1. EXTRACT TREATMENTS — compost extract application

Rate: **\$3.00 per gallon** of extract applied. Two ways to estimate — pick the one that fits the job.

A. By plant size (dosed to nursery size)

Dose per plant based on container / box size:

Plant size	Extract dose	Price / plant
#1 (~1 gal pot)	¼ gal (1 qt)	\$0.75
#5	1 gal	\$3.00
#15	3 gal	\$9.00
24" box	3½ gal	\$10.50
36" box	5 gal	\$15.00

All plant-size prices = dose × \$3/gallon.

B. By square footage

About **75 gallons per 1,000 sq ft** @ \$3/gal ≈ **\$225 per 1,000 sq ft**.

Field guide from LA applications: **200 gallons** typically covers roughly **2,500–3,000 sq ft** (about **12–15 sq ft per gallon**).

2. COMPOST APPLICATION — at planting

When planting, apply ½ to **1 cup** of SoCal BioAmendments living microbial compost in the planting hole with each plant.

Bag yield: one **3-gallon bag** (48 cups) covers about **48 plants** at 1 cup/plant, or up to **96 plants** at ½ cup/plant.
